Editing Trades

The Trade worksheet will now allow users to edit additional Trade details. Year, Make, Model, VIN, and Mileage and can now be edited in Console. This eliminates the need to go to MST to edit Trade-In Details.

Note: there are not any changes to the existing functionality of calculate/process trade/send to customer when editing the additional fields. The updates will continue to need to be processed, just as any previously updated values.

Payment Grid Customization

Customizations to your initially offered Purchase Type, Terms, Down Payment, Mileage combinations and the featured selection can now be made in your Dealer Daily-F&I Admin settings. Your featured selections, will reflect in Console on the **first** access of the Payment Grid worksheet when opening a write-up in 'Initiated' status.

Build: October, 2023

Opening Write-Ups in Initiated Status

Write-Ups in 'Initiated' Status will now be able to be accessed for Console users. Double click the write-up, or single click and select details in the Quick View Menu that opens to the right to open the initiated write-up. The Customer Information screen will open to confirm customer information. You can edit address information and select or update the Credit Score. First Name, Last Name, Email, and Phone cannot be updated in this screen.
