MST Release Notes

Build: May 15, 2023

The following enhancements will be implemented in the May 15th Mobile Sales Tool – Showroom Release.

MST Enhancements

Improvements in Temp VIN updates

When a Temp VIN/Serial Number is updated to a permanent VIN, the vehicle will no longer display as 'Unavailable' on existing write-ups. The existing write-up will be updated with the permanent VIN, eliminating the need to create another write-up for the customer. All existing CRM integrated functionality would now include the updated permanent VIN with any subsequent actions/updates.

Customer Address Updates

When a customer has an existing write up in Finalized or DFI Submitted status, you will now be able to update the customer address on existing or new write-ups with out needing to create a new customer record. Please note that the address on all write-ups that are in any status other than Finalized or DFI Submitted will be updated with the new address and the write-up status will be updated to 'Initiated'.

Share OCA Updates

The Share OCA link will only be available when the dealer is configured to enable "Sharing Features" and "OCA".
