Build: October, 2023

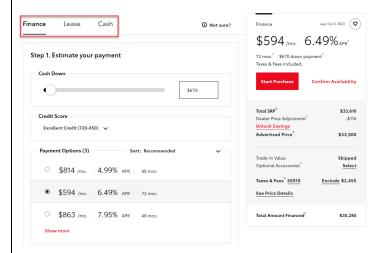

The following improvements have been slated for the October, 2023, MST-C release.

MST-C Changes

Payment Grid Update

The order of the offer types within the payment grid is now updated to show as Finance, Lease and Cash.

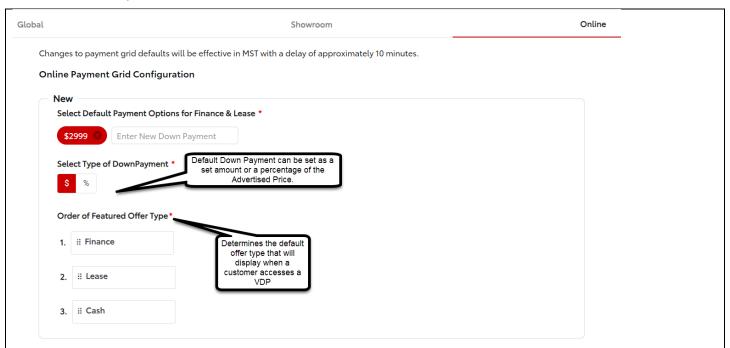

Payment Grid Customizations

Additionally, dealers can now set their preferred offer type as well as the default cash down via F&I Admin. To access this feature, the dealer can log into Dealer Daily (http://dealer.toyota.com).

Build: October, 2023

Ability to make email and phone number mandatory in lead forms

Dealers will now have the option to make email <u>and</u> phone number required when a customer is submitting a lead form from MST-C. For dealers to make this update, a request would need to be submitted to the PremierCare team.

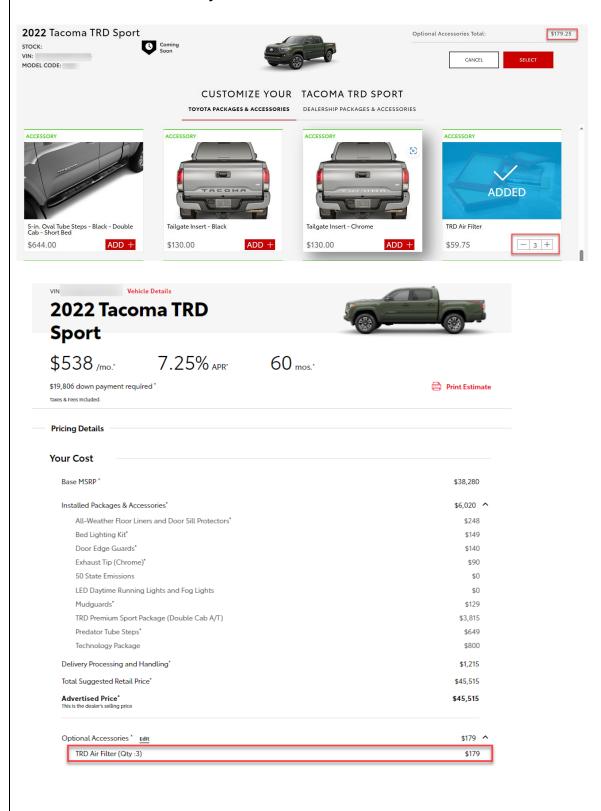

Accounting for the addition of more than one of the same accessory

Build: October, 2023

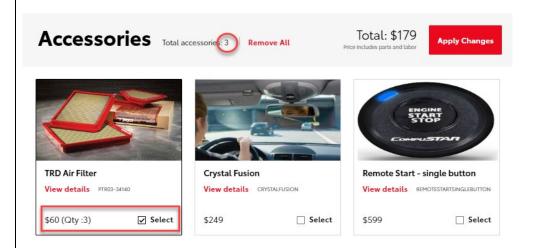

The Review Purchase page will now be able to show when a customer has added more than one of the same accessory in MST or Console.

Build: October, 2023

Please note that if the accessory is removed in MST-C, all instances of that accessory would be removed and if the customer would like to add more than one of the same accessory, this would need to be re-applied in MST or Console.

KBB Trade-In Error Handling

An update has been made to address scenarios where an invalid VIN has been entered or a VIN/particular models cannot be evaluated for trade-in valuation.
