

The Management Console Release on May 16th implements the following improvements

Various Improvements

Vehicle Section of Writeup Details

For Certified and Preowned vehicles, dollar amounts will not be displayed in Dealer Invoice and MSRP fields as they are not applicable in most cases for outside brands.

ACV will reflect \$0 and be addressed in a future Management Console update.

Vehicle Category :

Days In Stock	Dealer Invoice	MSRP	ACV
109 Days			\$0.00

Base Selling Price	Default	Counter
Base Selling Price	\$27,367.00	\$27,367.00

Selling Price	\$27,367.00
---------------	-------------

Cash Down & APR Display – Southeast Toyota Finance ONLY

An improvement is made in the grid to properly display APRs with Advance Percentage consideration. Click on a square in one row/term, and the cash down in the corresponding column is considered for the other two rows/terms on the grid.

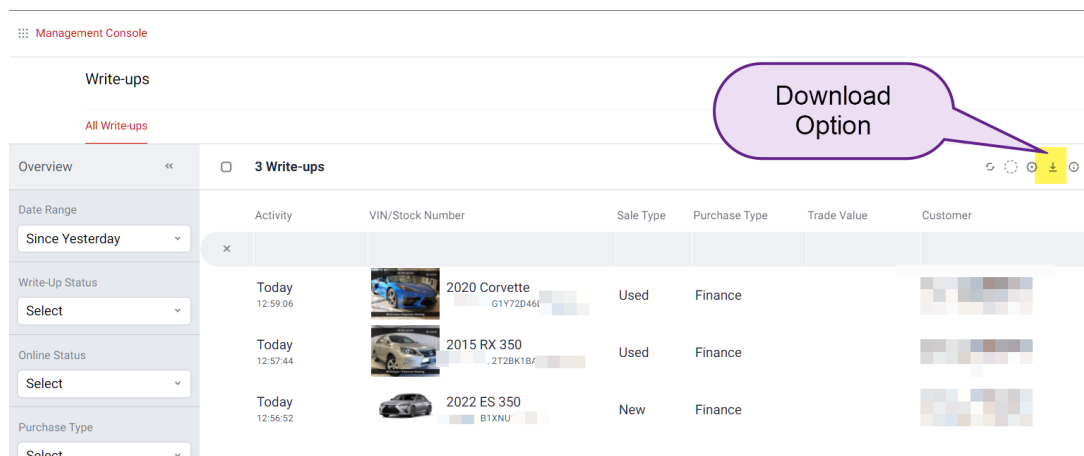

When a payment is selected, the correct APR has always shown that corresponds to the term and cash down selection. This improvement reduces questions/confusion as values may unexpectedly change in the grid after clicking on different cash down amounts.

Various Improvements

Download Option – Remove unshared MSTC Deals from output

A reminder on online purchase functionality: A user can start a purchase online, but the deal can't be viewed in the writeup grid until the customer finishes sharing with a confirmation.

Deals that are started, but not fully shared, are suppressed in the download list. This matches the display in the UI, where deals not fully shared are not viewable in the grid

Bug Fixes

The following general issues have been resolved as part of this release

- A scenario where an adjustment made in MST did not appear in Console as expected
- Corrected a failure to print Payment Grid or Selection for Confirmed/Finalized Cash deals
- Corrected an issue where APR was changing after submit back to customer
- Corrected an issue where Cash deals could not be approved back to MST in certain cases.
