

The Management Console Release on Jan 24th implements the following improvements

Writeup Enhancements

Retain Access to the Special Rate Toggle

An exciting and frequently requested update to Management Console is finally here! Previously, due to technical restrictions, the ability to flip between special and standard rates was only available *prior to the first time* a writeup was approved in Management Console.

Now, expect to be able to flip between special and standard rates at any point prior to finalization.

Keep in mind: not all VINs or terms have special rates/rcfs available.

Additional Option in Lease Miles - Certified

Look for 10,000 miles as an option in the Miles Per Year list for Certified VINs.

Bug Fixes

Lead Filtering

An issue was fixed so that making a selection in the Origin Type list will display leads that match the selection.

Reminders

REMINDERS
