

New Inventory – Expanded Promotability

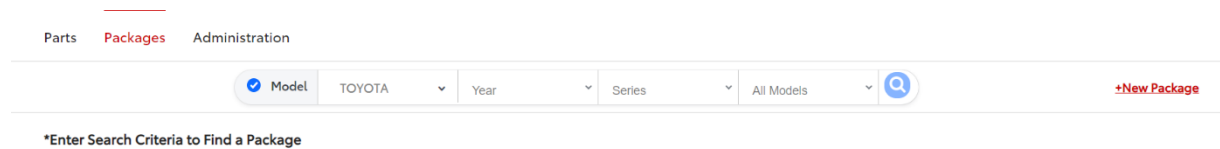

New Inventory – Expanded Promotability

New Inventory will now allow vehicles in Allocated Inspection (“AI”), In-Transit Inspection (“FI”), and Ground Inspection (“GI”) statuses to be promoted online. This will allow dealers more opportunities to present their inventory on their web sites.

DIO Administration - Packages

DIO Administration - Packages

DIO Administrators will be presented with a new tab, Packages, which will allow the creation and modification of OEM and Aftermarket Packages. This will allow dealers to maintain Packages as an accessory, while allowing the individual components to be listed out. Full transparency will be offered on MST/MST-C, as well as dealer web sites.

*Enter Search Criteria to Find a Package

Please refer to available DIO Admin documentation via Help Section, under Parts, for more details.

DIO Administration – Set Automatic Inventory Updates

DIO Administration – Set Automatic Inventory Updates

DIO Administrators will be presented with a new option under the Administration, “Set Automatic Inventory Updates”:

The screenshot shows a web interface with a navigation bar containing 'Parts', 'Packages', and 'Administration'. Below the navigation bar, there are two sections. The first section is titled 'Set Global Labor Rate' with a subtitle 'This will impact all DIOs'. It contains a text input field with a dollar sign icon and the value '185'. The second section is titled 'Set Automatic Inventory Updates' and contains a checkbox. Below the checkbox is a note: 'By selecting the checkbox, this will enable future DIO Admin changes to automatically update accessories in inventory.' A red 'Save' button is located in the bottom right corner of the form area.

After the box is checked, any updates made to accessory details in DIO Admin will automatically refresh existing accessories already installed on New Vehicle inventory.

This is intended to address the situation where dealers will need to remove accessories in inventory and re-add accessories back in inventory to capture the latest details in DIO Admin.
