

SmartPath

SUPER POWERS

Do you have people on your sales team who need super powers?

SmartPath has the capability to allow the sales consultants with proper Dealer Daily access to make changes to the APR, Vehicle Selling Price, and Trade Value, essentially giving them super powers!

Customers who want to match or utilize a rate from another lending institution can see the new payment when the sales consultant edits the APR from the pricing sub menu.

After a sales manager appraises the trade, the sales consultant can quickly enter the value, hit save, and the trade is processed.

If you have sales staff that need "super powers," all you need to do is open a ticket with PremierCare. Our team will then enable access. Then, your DD Admin will change RTI permissions for those individuals who are being granted the super powers!
